

Placing an order for patient isolation

Care Delivery

Quick reference guide

Patient isolation orders should be placed for all patients requiring isolation during their Emergency or Inpatient encounters.

Note: If the patient is admitted via Emergency, the isolation order should be placed by Emergency. If the patient is admitted via outpatients or as a direct ward admission, the admitting ward should place the isolation order.

The following Patient Isolation codes are available to be ordered:

- Airborne Precautions
- Contact and Airborne Precautions
- Contact and Droplet Precautions
- Contact Precautions
- Cytotoxic Precautions
- Droplet Precautions
- Pink Precautions – Cystic Fibrosis Isolation
- Protective Isolation

Placing an order for Patient Isolation

1. Navigate to the Orders tab from the Menu Bar and select **+ Add**.
2. Within the Search bar, enter "patient isolation" and select this from the drop-down options.
3. Select *Done*.
4. The Orders Entry Field will display.
5. Select the appropriate *Isolation Code* from the yellow mandatory drop-down list.
6. Select  and then enter password.
7. Click *Refresh*.
8. The Patient Isolation order will display within the Patient Care section of the Orders page.

Patient Care	
LCCH MB 5 WINTV Fin#:ADM12694766 Admit: 29-Jun-2018 10:54 AEST	
<input checked="" type="checkbox"/>  Patient Isolation	Ordered 23/07/18 14:01:00 AEST, Contact
