

Pre arrival information

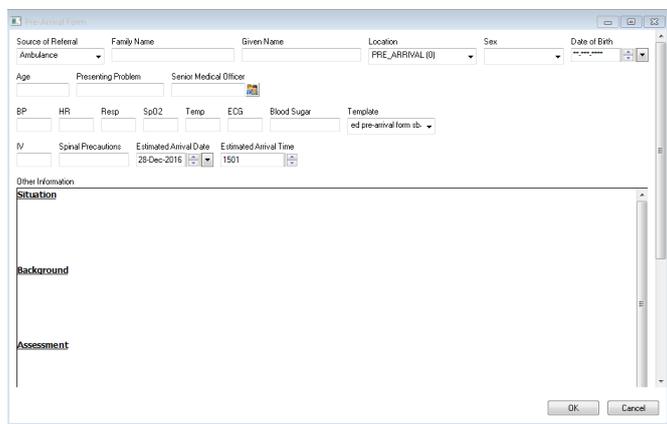

Quick reference guide

Pre Arrival (Patient expect information) can be entered from the **ED Tracking List** or from **LaunchPoint**.

1. Through the ED Tracking list, Click the **Pre Arrival** icon . The Pre Arrival window will open Through Launch Point, select the the **LCCH All beds and Prearrival** or **Triage** tab, click the blue person icon and select **Add Pre Arrival**.

2. The Pre Arrival window will open

3. Using the drop down menu select the **Source of Patient** first prior to completing any other details of the prearrival, as updating this field can cause other information to be lost.
4. Enter as many details as possible/relevant and click **OK**.
5. Navigate back to the ED LaunchPoint. The **Pre arrivals** can be seen on the screen under the **LCCH All beds and Prearrival**

tab. The purple colour indicates a Prearrival patient.

----------	---------------------

6. Single-click in the **Patient Information** field to open the Pre arrival record.
7. Once the patient is in the department, the Pre arrival information can be linked to the current encounter.
8. The Triage nurse can attach the prearrival to the emergency encounter in tracking list by selecting the patient's name and selecting the  clock icon and the option to **Attach Prearrival**.
9. All other staff are able to attach Prearrivals in Launch Point by right clicking in the patient's row and selecting the option to **Attach Prearrival**.
10. The Prearrival screen will open. Search for your patient in the **Available Prearrival** section.
